Career Objective

Computer Science graduate specializing in Data Science with hands-on experience in Python, SQL, Machine Learning, Web Development, and Data Analytics. Developed projects using Flask, Power BI, HTML, CSS, JavaScript, and MySQL. Strong problem-solving skills with practical exposure to data analysis, predictive modeling, and software development.

Work Experience

Executive – Logistics

Cargoman Logistics Pvt. Ltd. | May 2025 – Aug 2025

I worked as an implant for Qualcomm Corporation.

- Maintained and validated import shipment records for duty-free transactions.
- Managed data entry and transaction updates with high accuracy.
- Coordinated with teams to ensure compliance and timely documentation.
- Developed analytical and problem-solving skills through operational support.

Education

Bachelor of Technology (BTech) in CSE (DATA SCIENCE) in St Mary's Engineering college

| 2020 – 2024 | CGPA: 7.35/10

Skills

Programming Languages: Python, JavaScript, SQL

Web Technologies: HTML5, CSS3, JavaScript, React.js

Databases: MySQL, SQL

Framework: Django

Data Science & Analytics: Pandas, NumPy, Machine Learning, Data Visualization, Power BI

Tools & Platforms: Git, GitHub, VS Code, AWS Basics

Core Concepts: OOP, Data Structures, Problem Solving, REST APIs, Responsive Design

Strengths

- Quick learner and adaptable to new environments
- Strong attention to detail
- Team player with good organizational skills

Projects

Portfolio Website:

- Technologies Used: HTML, CSS, JavaScript
- Built a personal portfolio website showcasing projects and skills.
- Optimized website for mobile and desktop responsiveness.

Smart Attendance Management System | Python, MySQL

- Built a menu-driven console application to manage student attendance records.
- Developed features for student/teacher management, attendance marking, and report generation.
- Integrated MySQL database using mysql-connector-python for persistent data storage.
- Automated attendance percentage calculation and record retrieval through SQL queries.

Sales Analysis of Super Market:

- Designed interactive dashboards for sales and revenue analysis.
- Identified product performance trends and customer purchasing behavior.
- Generated actionable insights to support business decisions.

Certifications

- Application Developer certificate – Web and Mobile applications
- Data Analytics and Cloud Computing
